

SOUL

YOUR AI HAS A BRAIN. YOU GIVE IT A SOUL.

One face. Everywhere.

This book sets out how SOUL looks and sounds: the Glass O mark, its colours and type, and how to use them on screen, in print and on the product itself.

The labs make the brain. We make the body and the soul.

Large language models are becoming a commodity. What people will keep is the thing that sits on their desk, knows them, and looks back at them.

A body

Solid aluminium, a black glass face, a weight that feels right in the hand. Made to last on a desk for years.

A soul

A personality that is yours: memory, moods and a face that reacts. Any brain can plug in behind it.

One face

The two cream eyes on black glass are the whole brand. The product, the logo and the app all share them.

RENDER / CONCEPT (CGI) • SOUL M, SILVER

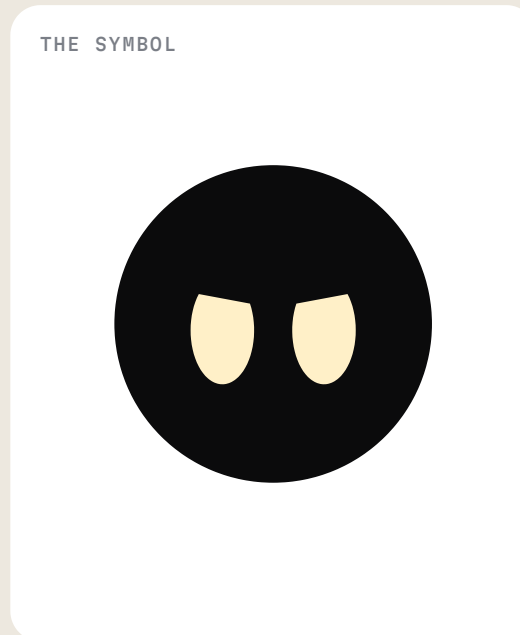

The O is the device's face.

In the all-caps wordmark SOUL, the O is replaced by what you see when you meet a SOUL: a round black glass disc with two living cream eyes, each with the same slightly knowing lid.

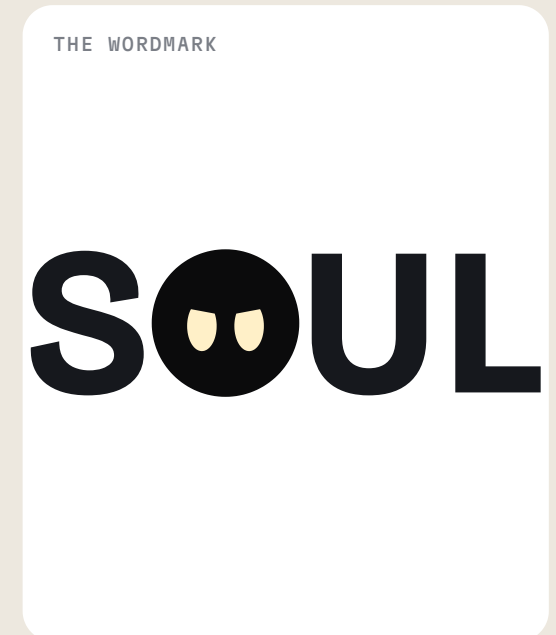

It is the product

Logo, device, boot screen and app icon become one image.

It reads everywhere

SOUL stays four plain Latin capitals. The face sits inside a letter people already read as O.

Calm, not cute

No mouth, no brain, no sparkles. The only character is the lid of the eyes.

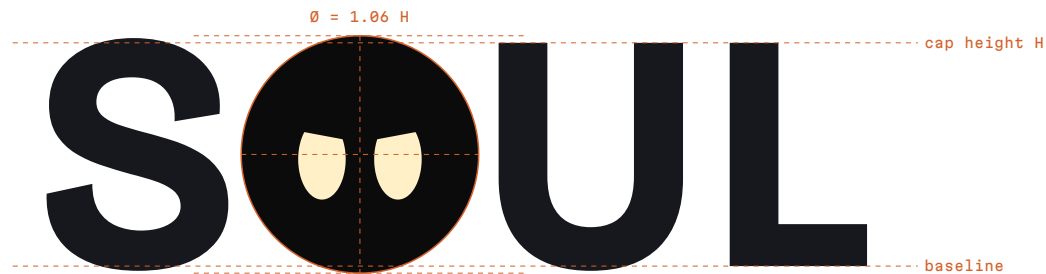

The wordmark 'SOUL' is rendered in a bold, dark navy blue, sans-serif typeface. The letter 'O' is a solid black circle. Within this circle, there are two almond-shaped cutouts, one on the left and one on the right, filled with a bright cream color. These cutouts are positioned to resemble a pair of eyes.

Default artwork. Ink letters, a black glass O and cream eyes, on light grounds. File: SOUL-Wordmark-Primary.

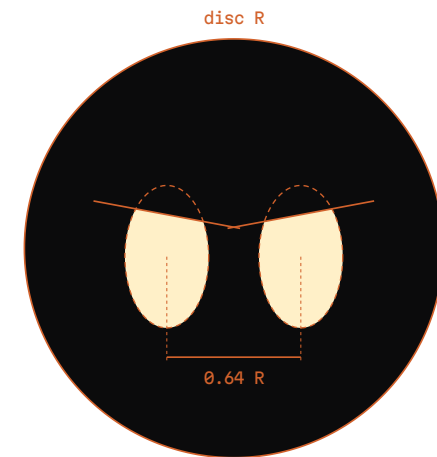

Never retype it. Every letter is an outlined path cut from Bricolage Grotesque 700; the disc and eyes are drawn geometry.

The eyes stay cream (#FFF0C8) in full colour. In one-colour work they are knocked out so the ground shows through.

Built, not typed.

Letters S, U, L: Bricolage Grotesque, wght 700, opsz 96, wdth 100, tracking +55/1000, outlined, overlaps removed. The disc replaces the O at $1.02 \times$ the O's height ($1.06 H$), same centre, kerned $\approx 2\%$ H tighter on both sides.

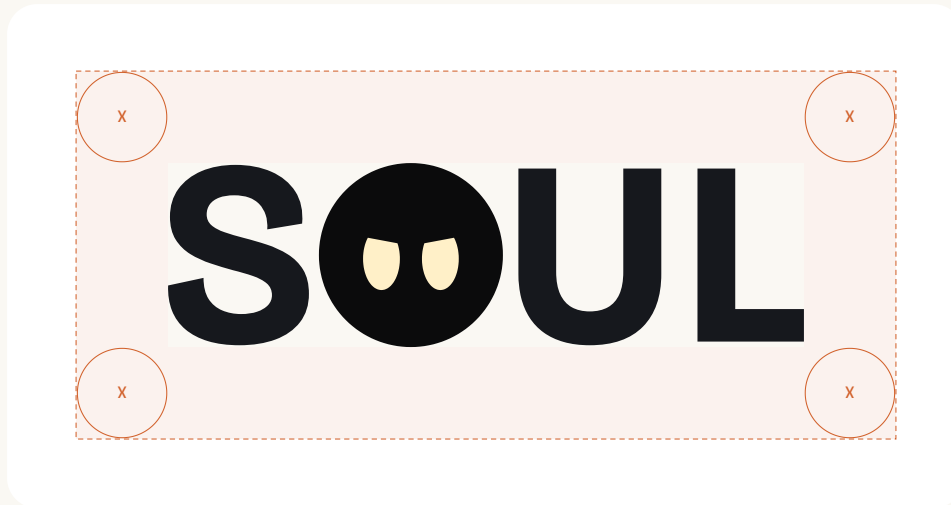

Eyes ellipses $0.40 R \times 0.68 R$, centres $0.64 R$ apart, $0.04 R$ below centre.

Lids one straight cut per eye, $0.24 R$ above the eye centre outside, $0.16 R$ inside: an 11° brow.

Bezel (dark grounds) disc at $0.915 R$ inside a Silver #CBCDCF ring.

Give it room.

X = $\frac{1}{2}$ Ø, half the diameter of the glass O (about half the cap height). Keep X clear on every side of the wordmark and the lockups. For the symbol on its own keep $\frac{1}{4}$ Ø.

ASSET	PRINTED AT MINIMUM (TRUE SIZE)	SCREEN	PRINT	ETCH
Wordmark	SOUL	72 px	18 mm	10 mm
Horizontal lockup	SOUL	96 px	22 mm	14 mm
Symbol	SOUL	16 px*	5 mm	4 mm

* Below 24 px use the pixel-fitted `favicon-16` master. Sizes are widths. Laser-etch and deboss always use the one-colour artwork: the disc is etched and the eyes stay bare metal.

One face per layout.

When the symbol is on the page, the wordmark next to it uses a plain O. When the wordmark stands alone, its O is the face. Never show two faces side by side.

SYMBOL • AVATARS, DEVICE UI, STAMP

HORIZONTAL LOCKUP • NAV BARS, SIGNATURES, PARTNER WALLS

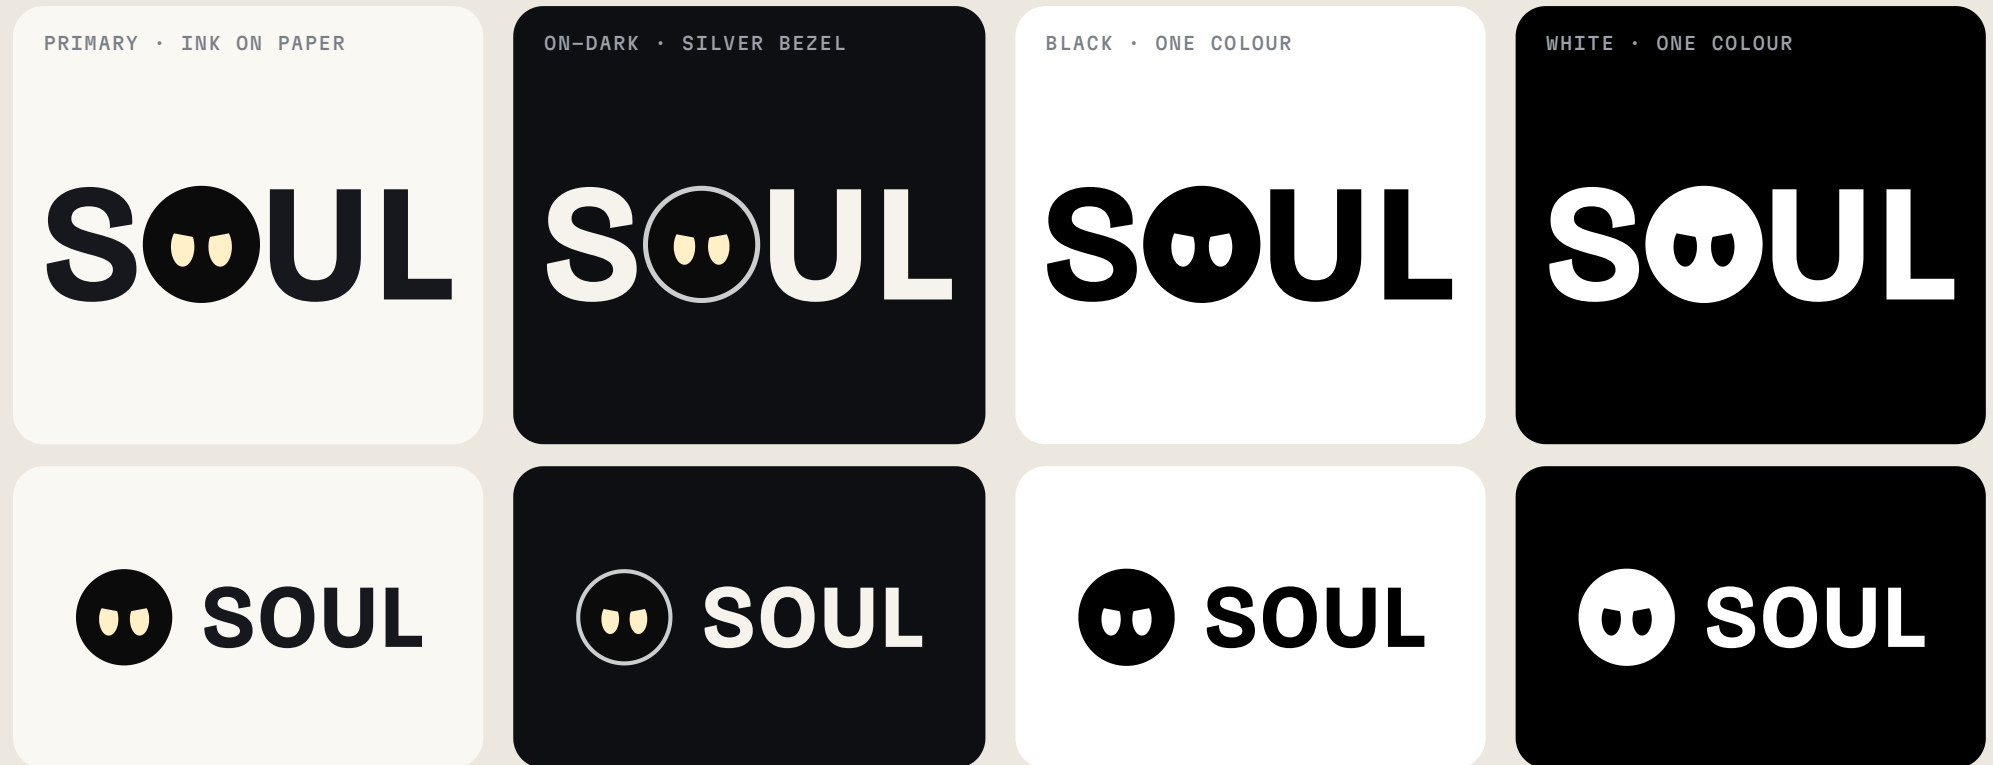

STACKED • PACKAGING, SPLASH

STACKED + TAGLINE

Four versions.

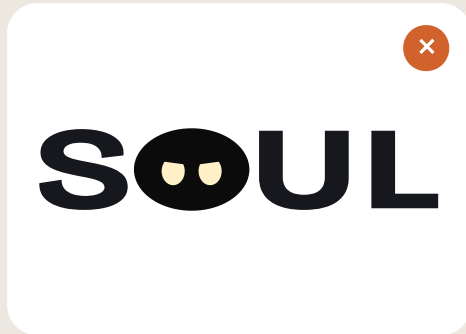

Use **Primary** on light grounds and **On-Dark** on anything darker than Graphite: its silver bezel echoes the chrome ring round the real glass. **Black** and **White** are true one-colour artwork with the eyes knocked out, for etching, embossing, foil and single-colour print.

Five finishes, one glass.

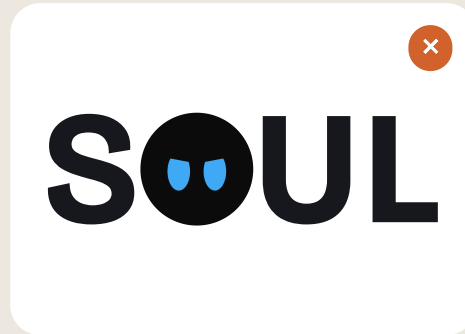

Letters are Ink on Silver and Champagne, and Warm White on Graphite, Midnight and Ember. The O always stays black glass with cream eyes, exactly like the real glass on every finish. On the anodised product itself, laser-etch the one-colour artwork.

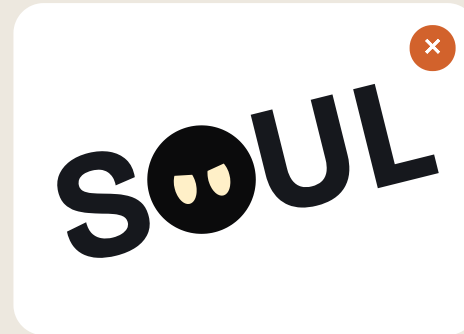

Keep the face calm.

Don't stretch or squash

Don't recolour the eyes

Don't rotate

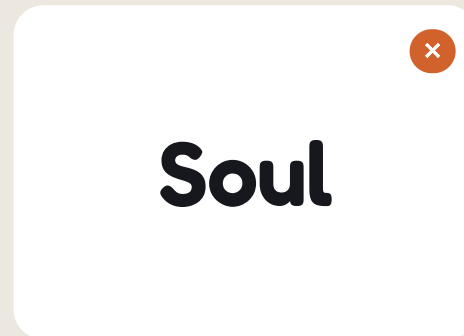

Don't add effects: shadows, glows, gradients

Don't place on busy backgrounds

Don't show two faces in one layout

Don't retype SOUL in a font

Don't use the full-colour O on dark without the bezel

Also: no mouth, smile arc, eyebrows, blush or sparkles on the logo; no outlines; no lowercase; no other O. The device can emote, the logo stays still.

Glass, cream and metal.

Glass HEX #0B0B0C RGB 11 11 12 CMYK 60 50 50 100 The face and the 0	Eye Cream HEX #FFF0C8 RGB 255 240 200 CMYK 0 5 25 0 The eyes, light	Ink HEX #16181D RGB 22 24 29 CMYK 75 65 55 80 Letters on light	Paper HEX #FAF8F3 RGB 250 248 243 CMYK 1 1 4 0 Light ground	Warm White HEX #F6F3EC RGB 246 243 236 CMYK 2 3 7 0 Letters on dark
Silver HEX #CBCDCF RGB 203 205 207 CMYK 20 14 14 0 Aluminium • bezel	Graphite HEX #55575B RGB 85 87 91 CMYK 60 50 45 30 Aluminium	Midnight HEX #26324C RGB 38 50 76 CMYK 95 80 40 35 Aluminium	Ember HEX #D2622C RGB 210 98 44 CMYK 5 72 95 0 Aluminium • accent	Champagne HEX #D8C3A2 RGB 216 195 162 CMYK 15 22 38 0 Aluminium

sRGB is the master. CMYK values are approximate starting points (Glass is a rich black); always proof before print. The five finish colours are the aluminium references from the manufacturing spec. Files: `Colours/SOUL-Colours.ase`, `colours.json`, `colours.css`.

Aa

Bricolage Grotesque

Display and headlines. The family the wordmark is cut from. 700/800 for headlines, 500 for large text. SIL OFL 1.1, Google Fonts.

DISPLAY • BRIC 800

Your AI has a brain.

HEADLINE • BRIC
700

You give it a soul.

BODY • BRIC 500

SOUL sits on your desk, remembers what matters to you, and looks back when you talk to it.

LABEL • MART 500

YOUR AI HAS A BRAIN. YOU GIVE IT A SOUL.

DATA • MART 400

SOUL M • 89.9 × 101.1 × 31.5 mm • Ø74.3 glass • SoulOS 3

Short. Warm. Confident.

SOUL talks like a good friend who happens to be very capable: few words, no hype, a little wit. English is the default; other languages follow the same rules.

Short

One idea per sentence. Cut adjectives. If a line works without a word, remove the word.

Warm

Talk to one person, as "you". Kind, never cute. No baby talk, no exclamation marks in a row.

Confident

State what SOUL does. No "revolutionary", no "AI-powered", no promises we cannot keep.

SAY

Your AI has a brain. You give it a soul.

It remembers. It looks up when you come home.

Any brain can plug in. The soul stays yours.

NOT

The world's first revolutionary AI-powered emotional companion!!

Leveraging cutting-edge LLM memory to deliver engagement.

Compatible with multiple third-party model provider ecosystems.
